Professional Summary

Business data analyst with 4+ years turning commercial, pricing and performance data into reporting that teams act on, across FMCG e-commerce, consumer electronics and agency clients. Builds the pipeline as well as the dashboard: SQL, Power BI, advanced Excel and Python, with a programming background that makes new tools quick to pick up. MBA graduate, BSc Civil Engineering; Dutch orientation-year visa with full work rights.

Key Skills

SQL | Power BI | Advanced Excel | Python | Data modelling | Dashboard development | KPI reporting | Forecasting & demand planning | Pricing & margin analysis | Reporting automation | Data cleaning & validation | Google Analytics (GA4) | Google Tag Manager | Commercial & category analysis | Stakeholder management

Professional Experience

FMCG Category & Commercial Analytics Intern, Joybuy | Apr 2026 – Jul 2026

Completed a 4-month programme and gained hands-on experience in commercial operations within JD.com Europe, part of the world's second-largest online retail ecosystem.

- **Forecasting:** Built an AI-assisted forecasting model on historical price and units-sold data covering ~350 promotional SKUs per week; reached ~80% accuracy in live testing and fed pricing, buying and out-of-stock decisions across a 5,000-SKU FMCG range.
- **Power BI reporting:** Designed a dashboard used by four category managers to track SKU, campaign and product-manager performance week over week, replacing manual Excel reporting for the FMCG team.
- **Margin & rebate analysis:** Calculated true weekly profit from purchase price, sell price, units sold and supplier rebates, and reconciled monthly rebates for the five largest suppliers against negotiated terms.

Affiliate Performance Marketing Analyst Intern, Philips DA (Versuni) | Aug 2024 – Mar 2025

Relocated to the Netherlands and completed an MBA internship with the D2C Affiliate team.

- **Revenue attribution:** Reconciled monthly affiliate payouts for 17 partners across 8 European markets, mapping discount-code usage to partner performance so every figure paid could be traced to its source.
- **Dashboard development:** Built a Power BI partner-performance model (SKU / week / market / revenue vs cost) covering completed and planned campaigns, cutting monthly reporting from three days to around five hours.
- **Analytics & tracking:** Implemented event, UTM and conversion tracking in GTM and GA4, and used top-SKU, regional and discount-effectiveness analysis to recommend which partner budgets to grow or reduce.

Digital Data Analyst, NetWebCo | Feb 2021 – Sep 2023

Joined a mid-size agency specialising in Magento e-commerce services.

- **Web analytics:** Built GA4 and Tag Manager measurement setups for 6 e-commerce clients (add-to-cart, checkout and campaign-source funnels) and presented conversion rate, traffic quality and on-site behaviour in monthly client reviews.
- **Paid-campaign analysis:** Analysed Google Ads performance on ~€3,000/month budgets per client, optimising toward conversion rate rather than traffic volume and restructuring campaigns around the keywords that actually converted.

- **Data automation:** Programmed a competitor price-tracking tool that repriced 4,000 products twice daily against a rival feed, and a de-duplication tool that cleaned ~15,000 products × ~10 attributes in one month, replacing an estimated four months of manual work.

SEO & Analytics Specialist, 19kala | Dec 2019 – Feb 2021

Worked in an OpenCart e-commerce operational team environment.

- **Internal tooling:** Designed and built a PHP / JavaScript / MySQL task-management system with seven approval stages and role-based access for ~20 users; 1,100 tasks ran through it in year one and monthly output rose from 15 to 35 articles.
- **Price monitoring:** Built a crawler tracking ~100 high-value SKUs across 5 competitor stores three times a day, alerting the sales team by email whenever the company lost its price position.
- **Search & traffic analysis:** Diagnosed indexation and rendering issues in Google Search Console (70,000 junk URLs consuming crawl budget, blocked CSS) and tracked recovery as daily visits grew from 30,000 to 190,000 in 9 months.

Education

MBA (Master of Business Administration), Wittenborg University of Applied Sciences, Netherlands | Oct 2023 - Oct 2025
BSc, Civil Engineering, University of Science and Culture | Oct 2014 - Aug 2018

Technical Proficiencies

SQL (MySQL) • Power BI (DAX, Power Query) • Advanced Excel • Python • PHP • JavaScript (basic) • GA4 • Google Tag Manager
• Google Search Console • HubSpot
