Professional Experience

Category Management Associate, Joybuy, Rotterdam | Apr 2026 - Present

- JD.com's online retail business in Europe.
- Managed end-to-end product onboarding on the e-commerce platform, coordinating with the Beijing team and communicating directly with suppliers to gather required information and ensure accurate, timely product listings.
 - Acted as the operational backbone for the category management team — tracking tasks, aligning priorities across managers, and ensuring smooth day-to-day execution across internal teams and external stakeholders.
 - Built an AI-assisted sales forecasting model with ~70% accuracy, using historical pricing and units sold data to predict campaign performance and support data-driven commercial planning.
 - Supported the full rebate process end-to-end — consolidated data across all category managers, calculated real rebate values, submitted figures into the system, and tracked payments against negotiated terms. Currently documenting and standardizing the entire workflow with the goal of making it structured, repeatable, and transferable across the team.

Affiliate & Performance Marketing Intern, Philips DA (Versuni), Amsterdam | Aug 2024 - Feb 2025

Hired by the D2C affiliate & partnerships team to support performance tracking, reporting automation, and data-driven campaign coordination across multiple European markets during the MBA program at Wittenborg University.

- Collaborated with 18 strategic affiliate partners to achieve +36% YoY revenue in 2024 via data-driven campaign planning & execution.
- Coordinated 19 Black Week campaigns together with teams and partners, overseeing assortments, discounts, vouchers, and payments during peak season.
- Developed automated monthly performance reports + Power BI dashboard for all L&I partners, enabling SKU/date/market/revenue tracking and actionable insights.
- Supported partner ROI improvement through KPI analysis (top SKUs, regional trends, discount effectiveness) and co-delivered Q3/Q4 QBRs with sales results & recommendations.
- Supported the Affiliate & Partnerships team in running and tracking digital campaigns across European markets.
- Assisted in preparing monthly partner performance reports using Power BI and Excel.
- Helped monitor key metrics such as revenue, product performance, and campaign results.
- Supported coordination of Black Week and seasonal campaigns, including discounts, vouchers, and partner communication.
- Worked closely with marketing and sales teams to ensure accurate data tracking and reporting.

Digital Data Analyst & Performance Specialist, NetWebCo, Tehran | Feb 2021 - Sep 2023

Joined a mid-size agency specializing in Magento e-commerce services to support website performance analysis, technical issue investigation, and data-driven optimization initiatives for multiple client projects.

- Executed SEO strategies for multiple clients.
- Conducted comprehensive SEO audits to identify technical, content, and performance issues, and supported the implementation of practical, prioritized improvements.
- Investigated and resolved technical SEO issues related to indexing, crawling, site performance, and implementation errors in collaboration with developers and internal teams.
- Collaborated with the development team to resolve technical issues and expedite solutions.
- Identified and troubleshooted technical problems related to SEO implementation and website performance.
- Supported the development and execution of Google Ads strategies aligned with client business goals and target audiences, ensuring consistency between paid campaigns, landing pages, and SEO efforts.
- Optimized client websites to improve organic visibility by applying on-page, technical, and structural SEO best practices tailored to each business context.
- Programmed WordPress plugins exclusively for SEO schemas, blog page ad exhibition, and automatic Woocommerce attribute corrections.
- Optimized client websites to improve organic visibility and search rankings.
- Conducted technical SEO checks and fixed issues related to crawling, indexing, and site performance.
- Performed keyword research and supported content planning for e-commerce websites.
- Assisted in link-building and outreach activities.
- Supported Google Ads strategy alignment with SEO and landing pages.
- Rendered consulting services to company clients regarding digital marketing and SEO.
- Developed and executed short-term and long-term SEO strategies.
- Analyzed client websites and presented a list of website issues along with solutions for resolving them.
- Consulted and executed optimized Google Ads campaigns.
- Analyzed data to track the performance of our campaigns and made data-driven decisions
- Monitored and responded to customer feedback to ensure a positive customer experience
- Supported SEO and digital marketing activities for agency clients.
- Analyzed client websites and prepared reports on technical and content issues.
- Assisted in running Google Ads and tracking campaign results.
- Helped develop and execute short-term SEO action plans.

SEO & Website Optimization Specialist, 19kala.com, Tehran | Dec 2019 - Feb 2021

Worked in a structured e-commerce operational team environment to support KPI tracking, workflow visibility, and data-informed execution across SEO and content initiatives.

- Propelled organic traffic growth from 30,000 to 190,000 monthly visits within a 9-month period.
- Helped streamline SEO operations by improving task visibility and follow-up, contributing to more efficient workload distribution without disrupting output quality.
- Built a lightweight internal task management tool using PHP and JavaScript to help the SEO team better organize workflows, track responsibilities, and improve transparency across daily activities.
- Implemented structured task logic (priorities, roles, progress tracking) to support collaboration within a 20+ member SEO team and improve consistency in execution.
- Analyzed and resolved technical SEO issues reported in Google Search Console.
- Supported 19kala's blog as a WordPress programmer and plugin developer.
- Created and maintained SEO-focused schema solutions within WordPress to support structured data implementation across key pages.
- Provided input on product entry strategies and content topic selection by combining keyword research with performance data and search intent analysis.
- Managed a content calendar that included social media, blog posts, and other content that could attract our target audience
- Supported the SEO team in improving website structure, internal linking, and content optimization.
- Helped increase organic traffic through keyword-focused content and technical improvements.
- Monitored Google Search Console and resolved indexing and performance issues.
- Built an internal PHP-based task-tracking tool to help the SEO team organize and manage daily work.

3d modeling tutor, University of Science and Culture, Tehran | Nov 2017 - Nov 2018

Civil engineering university

- Delivered 8 university-approved AutoCAD and SketchUp training sessions to a cohort of 25 architecture students, focusing on 2D drafting standards and 3D modeling fundamentals.
- Taught students how to develop accurate 2D construction drawings and convert them into structured 3D models for visualization and presentation purposes.
- Designed practical exercises and project-based assignments to help students apply modeling techniques to architectural and civil engineering scenarios.
- Provided individual technical guidance and feedback to improve modeling accuracy, spatial understanding, and software proficiency.

Education

Master of Business Administration

Wittenborg University of Applied Sciences, Netherlands | Oct 2023 - Oct 2025

Bachelor of Civil Engineering

University of Science and Culture | Aug 2018
